--Disclosure of Related Application

Q8 U.S. application Serial No. 09/233,205 discloses the use of a disc holder for holding the disc and which is insertable and removable from the disc cartridge together with the disc. Fig. 12 shows a disc insertion and removal member in accordance with the copending application, wherein a disc insertion and removal opening and closing member 10g is structured such as to be capable of being taken out from the disc cartridge 1. At a time of attaching the disc insertion and removal port opening and closing member 10g, the disc insertion and removal port opening and closing member 10g is locked by a fitness between a locking hook 6g and a locking hole 7g. It is structured such that the disc 4 can be taken out of the disc cartridge 1 by a disc auxiliary member 2 which changes and holds the disc as described in the copending application and is arranged in the disc insertion and removal port opening and closing member 10g at a time of taking out the disc insertion and removal opening and closing member 10g.

Fig. 13 illustrates another form of a disc holding member wherein a disc insertion and removal opening and closing member 10h is structured such as to be capable of being taken out from the disc cartridge 1. At a time of attaching the disc insertion and removal port opening and closing member 10h, the disc insertion and removal port opening and closing member 10h is locked by a fitness between a locking hook 6h
